

# The Premier LMS for Law Firms

## SavvyAcademy Learning Management System

The SavvyAcademy LMS, powered by LearnUpon, provides all of the flexibility, customization and tracking features that law firm trainers and managers need today – at an affordable cost.

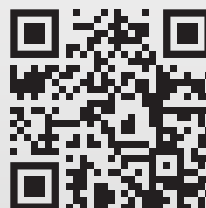

### The SavvyAcademy LMS Offers:

- **Trackable, Reportable Data Down to Each Individual User:** Great for ROI conversations and annual performance reviews. You can even track external CLE trainings and conferences that people attend.
- **Control and Customization:** Built for trainers and administrators who need to tailor their continuing education to individual attorneys or non-lawyers, from new hires to seasoned legal eagles. You control the flow, from voluntary “just-in-time” training, to instructor-led, classroom-based training to customizable courses and learning paths. Also, it’s easy to add your own content and your own brand.
- **LMS Subscription Includes the SavvySMART Content Library:** The SavvySMART Content Library is a complete package of all of Savvy’s award-winning training materials, including ELearning tutorials, quick reference guides, user and instructor training manuals, assessments, and over 250 recorded webinars, all specifically for law firms.
- **Priced by the Seat:** Only pay for users, not for everyone in the firm.
- **No Annual Capital Expense for Hardware or Software:** The SavvyAcademy LMS is cloud-based, and we update the functionality of the LMS regularly.
- **ISO 27001 Certified.**

# The Premier LMS for Law Firms

## Not just for trainers.

The SavvyAcademy LMS is a robust platform that can help your firm manage much more than its training needs.

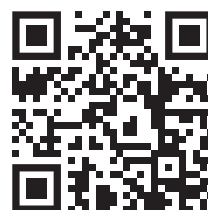

- **Human Resources:** Store annual personnel plans; develop professional development goals down to each individual and track achievements; create a library of HR resources such as the employee handbook, and much more.
- **IT:** Manage Help Desk tickets and create alerts for the training team so that they can launch trainings to combat your most common questions; provide the Help Desk with the ability to look up answers and share tutorials with users, and much more.
- **Office Management:** Create libraries of common-use materials so that designated users can access as needed, and much more.
